

Grow-Genius **mono-silicic**

As a major structural element in plants, silicon improves many aspects of endurance and function. Monosilicic acid is the ONLY form of silicon that plants can naturally take up and use straight away: so Grow-Genius mono is immediately available for use on contact with roots, leaves, flowers or fruit.

FOR FASTER GROWTH, STRESS RESISTANCE AND YIELD GAINS:

Weekly: Add 0.3 ml per 10 L to your system or water on by hand. Apply from germination / propagation to a few days before harvest.

Fortnightly: Apply 0.5 ml per litre as a foliar spray until a few days before harvest. Do not spray very dense or resinous flowers.

Guaranteed analysis: 40% Monosilicic acid

mono-silicic

40% MONOSILICIC ACID
fast acting bioavailable silicon
FOR ALL PLANTS

Net contents: 1.32 Gallons (5 Litres)

CONTAINS NON-PLANT FOOD INGREDIENTS:
70% Tetraethyl silicate
20% Alcohol stabilisers
10% Polysiloxane (wetting agent).
Information on levels of metals in GG mono is available at:
